

T SUBHAM PATRO

Intern AI/ML Engineer — Machine Learning & Generative AI — Data Security & MLOps

☎ +91-7440146537 — ✉ subham.t.patro.2005@gmail.com

🌐 linkedin.com/in/krazatec — 🐙 github.com/KRAZATEC

📍 Bengaluru, Karnataka, India

Education

- **Gitam University** Bengaluru, Karnataka, India
Bachelor of Technology - Computer Science and Business Systems; GPA: 8.13
August 2023 - Present

Skills Summary

- **Languages :** Python, C, JavaScript, SQL, Java, Bash
- **AI and ML Frameworks :** TensorFlow, PyTorch, Keras, Scikit-learn, LangChain, LangGraph
- **Data and Vision Libraries :** OpenCV, NumPy, Pandas, SpaCy
- **Backend and MLOps :** FastAPI, Streamlit, MLflow, Weights and Biases, Vector DBs (ChromaDB)
- **DevOps and Cloud :** Docker, Kubernetes, Terraform, GIT, CI/CD (GitHub Actions)
- **Databases and Cloud :** PostgreSQL, MySQL, MongoDB, AWS, GCP, Azure

Experience

- **JMR Infotech** Bengaluru(On-Site)
AI and ML Intern May 6 2026 - Present
 - Contributed to the development of Sense AI, an emerging AI-driven platform in the BFSI domain, by building and optimizing 3+ AI/ML workflows for automation and predictive analytics.
 - Executed secure cloud and MLOps pipelines for Sense AI, cutting deployment and processing time by nearly half while improving scalability for enterprise financial applications.
 - Collaborated with backend, security, and AI teams to enhance Sense AI's data reliability and integration capabilities, streamlining BFSI workflows with faster and more reliable processing.
- **Springer Capital** USA(Remote)
AI Intern February 1 2026 - May 1 2026
 - Structured and deployed an Investment Sentiment Analysis System, improving internal investment signal prediction accuracy by around 10–15 percent through advanced ML models in TensorFlow/PyTorch and Python data stacks.
 - Established and maintained 5+ end-to-end data pipelines using NumPy/Pandas, enabling reliable model training and evaluation across multiple internal datasets with near-zero data quality issues.
 - Crafted systematic model performance validation and bias checks across 3+ production models, helping ensure fair and consistent outcomes for key investment decision workflows.

Projects

- **Neo-stats 🐙 (RAG, Python, Streamlit, Multi-LLM)** Built a multi-domain RAG chatbot orchestrating multiple LLMs for intelligent, context-aware information retrieval across domains.
- **AI NIDS 🐙 (Python, ML, Streamlit)** Developed an AI-powered Network Intrusion Detection System using ML classifiers to identify and flag anomalous network traffic in real time.
- **Customer Support Agent 🐙 (Groq LLM, LangGraph, Streamlit)** Architected an AI-powered support assistant using LangGraph workflows and LLMs to automate customer interactions.
- **Phis-Guard-AI 🐙 (ML, JavaScript)** Deployed a real-time phishing URL detection tool using ML, accessible as a live web app on Railway with client-side JavaScript integration.
- **Presidio-PII-Detector 🐙 (spaCy NLP, FastAPI, Docker)** Invented a production-grade PII redaction API using Microsoft Presidio and spaCy NLP, containerized with Docker and served via FastAPI.
- **Nova-Desktop-Voice-Assistant 🐙 (NLU, LLM Orchestration, Python)** Designed a modular desktop voice assistant combining NLU pipelines with LLM orchestration for context-aware, command-driven interactions.
- **Healthcare-Agent 🐙 (Groq LLM, Streamlit, Medical Imaging)** Created a multimodal AI healthcare agent integrating Groq LLM with medical imaging analysis for clinical decision support.
- **AI-SOC-Platform 🐙 (ML Anomaly Detection, Docker)** Made an AI-driven Security Operations Center platform with ML-based threat detection and a real-time monitoring dashboard, containerized via Docker.

Certifications

- Microsoft Azure Security Engineer Associate (AZ-500)
- Google Cloud Cybersecurity Professional
- Artificial Intelligence Fundamentals – IBM
- INE Certified Cloud Associate
- Cyber Security Analyst (C3SA)
- ServiceNow Virtual Internship
- VOIS Cyber and GenAI Virtual Internship
- Microsoft Azure Virtual Internship
- IBM AI and ML Virtual Internship
